BENEFITS TO STAKE HOLDERS

For Patients:

- Reduced waiting time
- Transparent billing
- Easy access to medical history & reports

For Doctors & Staff:

- Less paperwork, more focus on care
- Easy access to patient history and reports
- Efficient communication with administration

For Management:

- Cost savings through automation
- Real-time data for better decision making
- Compliance with legal & medical tandards

TECHNICAL HIGHLIGHTS

- Deployment: Cloud-based & On-premise
- Architecture: Scalable, Modular, API-ready
- Integrations: Lab machines, RFID, biometric, insurance APIs
- Technology: Web + Mobile (iOS & Android)
- Support: 24/7 customer service, training & updates

ABOUT US

Genieplex Technologies Pvt. Ltd. is a leading technology provider with expertise in healthcare automation solutions. We specialize in developing hospital ERP, RFID-based patient tracking systems, IoT healthcare solutions, and telemedicine platforms.

With a strong footprint across hospitals, clinics, and healthcare institutions, we deliver innovation, security, and reliability in every solution.

Hygiene That Heals

Hygiene That Heals

HOSPITAL MANAGEMENT SOFTWARE (HMS)

"Digitizing Healthcare. Empowering Hospitals."

INTRODUCTION

Modern healthcare demands efficiency, transparency, and accuracy. Our Hospital Management Software (HMS) is a comprehensive ERP solution that automates and integrates every aspect of hospital operations, from patient admission to billing and discharge.

WHY HOSPITALS NEED HMS:

- Increasing patient load requires digital solutions
- Manual systems cause errors and inefficiency
- Compliance with healthcare standards is mandatory
- Patient experience is the key to hospital reputation

CORE MODULES

1. Patient Management System

- Digital registration & patient history tracking
- OPD & IPD management with bed allocation
- Appointment scheduling with reminders
- Electronic Health Records (EHR) with easy retrieval

2. Doctor & Staff Management

- Duty rosters and shift scheduling
- Staff attendance via RFID/biometric
- Doctor-patient communication portal
- Payroll & HR integration

3. Laboratory Information System (LIS)

- Lab test requests directly from doctors
- Automated test results with equipment integration
- Reports delivered via SMS/email/portal
- Reduced human error with barcode-based tracking

4. Pharmacy & Inventory

- Drug stock management with real-time updates
- Expiry date alerts and low-stock notifications
- Barcode scanning for dispensing medicines
- Seamless integration with billing

5. Billing & Financial Accounting

- Automated patient billing (IPD, OPD, pharmacy, lab)
- Insurance & TPA integration for cashless claims
- GST/VAT compliance with customizable tax rules
- Multi-currency support for international hospitals

6. Administration & MIS Reporting

- Dashboard view of hospital operations
- Daily, weekly, monthly MIS reports
- Revenue tracking & forecasting
- Compliance-ready audit reports

EXTENDED FEATURES

- Telemedicine Integration: Virtual consultations & remote monitoring
- Patient Portal & Mobile App: Appointment booking, report access, billing history
- IoT & RFID Integration: Smart tracking of patients, staff, and assets
- Security & Privacy: Role-based access, data encryption
- Multi-branch Support: Centralized management for hospital chains
